Professional Profile

Computer Science student with a Chemistry minor, graduating December 2026. Combines academic software, data, security, and laboratory work with experience in customer service, staff training, sales reporting, and operational oversight.

Selected Competencies

Programming and Systems: Python, C, SQL, SQLite, NumPy, Matplotlib, Linux, POSIX threads and sockets
Data and Laboratory: Excel, StatCrunch, regression, calibration, uncertainty, UV-Vis, titration, pH measurement
Networks and Security: Wireshark, Packet Tracer, Docker labs, Scapy, iptables, permissions and ACLs
Business and Communication: Staff training, customer service, sales analysis, scheduling, technical reports, Toast POS

Education & Development

MONTCLAIR STATE UNIVERSITY | B.S. Computer Science | Chemistry Minor | Expected December 2026
Dean's List: Fall 2024–Spring 2026 | Middlesex Community College: Associate of Liberal Arts

Selected Academic Projects

STUDENT ENROLLMENT APPLICATION ~ Python | SQLite

- Designed student, course, and enrollment tables and implemented search, enrollment, withdrawal, and record management. Used parameterized SQL and a composite enrollment key to structure data relationships; delivered code, a database, and schema documentation demonstrating consistent student record workflows.

EXPLORING PACKET SPOOFING AND FIREWALLS ~ Docker | Scapy | iptables

- Configured a container network, captured and generated packets, and tested stateful and stateless rules, connection tracking, traffic limits, and load balancing. Compared how rule placement and connection state affect communication; documented setup, commands, and observed filtering behavior in a report.

LINUX ACCESS CONTROLS ~ Linux Permissions | Access Lists

- Mapped an access-control scenario to an access matrix, access lists, and Linux ownership and permissions. Assigned processes the access required for their tasks to apply least privilege; documented permission reasoning, configuration commands, and verification evidence in a lab report.

STANDARDIZING NaOH AND ANALYZING AN UNKNOWN ACID ~ Titration | Excel

- Standardized NaOH against potassium hydrogen phthalate with replicate titrations and measured pH while titrating an unknown acid. Used blank corrections and Excel calculations to establish titrant concentration for quantitative analysis; produced a report and workbook documenting results, the pH curve, and unknown-acid calculations.

Professional Experience

THE CHOP SHOP | Old Bridge, NJ ~ Server | July 2026–Present

- Built guest relationships from the first interaction and provided a welcoming, personalized dining experience to support customer satisfaction and loyalty.

MEXIMODO | Jersey City and Metuchen, NJ ~ Floor Manager and Head Server | October 2023–May 2026

- Responded to diverse guest needs in a fast-paced environment, strengthening adaptability and problem-solving skills.
- Scheduled servers and bartenders based on strengths, development needs, and team dynamics to improve staffing and service.
- Designed and implemented floor plans to improve operational efficiency, workflow, and the guest experience.
- Coordinated front-of-house operations and team communication, strengthening leadership and organizational skills.

RED ROBIN | Woodbridge, NJ ~ Associate Manager and Server | November 2020–April 2023

- Studied Profit & Loss (P&L) management, including food, liquor, and labor costs and their impact on restaurant profitability.
- Evaluated how operational costs, staffing, and resource allocation affect financial performance.
- Coordinated Front of House and Back of House communication among servers, bartenders, hosts, and kitchen staff to support daily operations.
- Reviewed sales trends, cash deposits, discounts, voids, and refunds to support financial accuracy and accountability.
